

Registration, Evaluation, Authorisation and Restriction of Chemicals Regulation (REACH) (EC) 1907/2006

Elcometer Ltd are a "Downstream User" of chemical substances and do not have to pre-register substances before the REACH deadline of 30th November 2008.

We are contacting our suppliers to ensure that they, or their principles, intend to pre-register all substances we purchase from them for use in our preparations. At the same time we are informing them of the applications for substances to enable them to list these as an "Identified Use" so that an "Exposure Scenario" can be determined.

All the substances that we import are significantly below the registration threshold of 1 tonne per annum.

It is expected that the list of pre-registered substances will be available on 1st January 2009. We will then check that all substances used in our preparations are registered and if not we will consult the agency for advice on alternative suppliers of the substances or seek alternative substances that are registered.

A handwritten signature in black ink, consisting of a stylized 'M' and 'S' intertwined.
